Utility Bill Audit Service

What is a Utility Bill Audit: A comprehensive review of a business' utility bills including electricity and natural bills to identify errors, correct mistakes, and collect on any overcharges and savings opportunities.

Which Businesses/Organizations Could Benefit: Industrial, commercial, retail businesses; non-profit organizations; and municipalities

Why Have A Utility Audit Performed:

- ✓ **Save Money:** Experts have found that 70% or more of reviewed bills contain errors or savings opportunities.
- ✓ **Save Time:** Most in-house staff do not have the time, expertise or vested interest to carefully review invoices for complex billing issues. We conduct a thorough utility review so you and your staff are able to focus on running and growing your business.
- ✓ **100% Contingency Based:** If we don't find overcharges or future savings, you owe nothing; if we do find some, we share in the refund and/or savings obtained.
- ✓ **Minimal Time Commitment & Participation Required:** We are respectful of your valuable and limited time so we keep your involvement in the audit process to a minimum. To get started, we only need 5 minutes of your time to gather the following:
 - Complete, current copy of your electricity and natural gas bills
 - Signed and dated 1-page agreement specifying our contingency-based review
 - Letter of Authorization (LOA) from you to your utility providers allowing us to access your billing history
- ✓ **Customer Service:** We focus on identifying utility errors and advocate on your behalf to correct and collect any overcharges or savings opportunities. Throughout the process we stand ready to answer questions, address concerns, and provide updates.
